Dimensions:

Length 6419 mm Width 345 mm Height 220 mm

Play Values

This product supports the following areas of child development.

tretching & Flexibility

Problem Solving

Hand-eye

Co-ordination

Description

"Traversing" means to climb across rather than to climb up. This activity requires skill, strength and agility. The traverse walls have handholds and footholds which allow children to move along the wall. It provides a great way for children to exercise and is popular in the school playground. Traversing aids co-ordination and helps to develop upper body strength. Differing routes offer easy or difficult ways to travel stimulating the child to work out which route to take.

Double traverse walls are a great way to get children active by being simple yet fun.

SAFETY SURFACING

No safety surface is required if used correctly as the critical fall height is less than 600mm. However we suggest installing surfacing if the equipment will be used without supervision.
